COVID-19 Protocols for Students

Victoria College is committed to creating a safe environment for all members of the campus community. We must each do our part to stop the spread of COVID-19 on the Victoria Campus and in our community. This document outlines the COVID-19 protocols developed to support students at Victoria College.

I. Practice Safety Precautions
   o We recommend that you wear a facial covering when in public areas of a building and any time social distancing is not possible.
   o Wash your hands frequently.
   o Visit our website for updates and more details at www.VictoriaCollege.edu/COVID-19.

II. Screening Stations
   • Temperature checks are no longer required to enter Victoria College facilities.
   • By entering a VC facility, individuals are confirming they have no symptoms of COVID-19.
   • Screening stations will be located at certain entrances of each building, should an individual want to monitor their temperature.
   • These entrances are marked by an orange cone outside of the entrance.

III. COVID-19 Symptoms and Self-Reporting Process

   COVID-19 has a wide range of symptoms ranging from mild symptoms to severe illness. Symptoms may appear within 2-10 days after an exposure to the virus.

   Below are symptoms associated with COVID-19:
   • Headache
   • Diarrhea and vomiting
   • New loss of taste or smell
   • Fatigue
   • Muscle or body aches
   • Cough
   • Congestion or runny nose
   • Fever and chills
   • Shortness of breath or difficulty breathing
If any student experiences the above symptoms, they MUST complete the Victoria College’s COVID-19 Self-Reporting Form found on the Victoria College COVID-19 Resource Page.

IV. Keeping Everyone Safe

- Do not come to campus if you are not feeling well.
- Remain at home if you are experiencing COVID-19 related symptoms. If you are on campus leave immediately.
- Contact your health care provider or the Victoria County Health Services Department at (361) 578-6281.
- Notify your instructor(s) to let them know you are experiencing COVID-19 related symptoms.
- Complete the COVID-19 Self Reporting Form

The COVID team will contact students within 24 hours after receiving the COVID-19 Self Reporting Form to begin the contract tracing process and provide additional guidance to students.

V. VC Contact Tracing

In an effort to help stop the spread of COVID-19 on the Victoria College campus, the COVID Team will conduct contact tracing for students. Contract tracing helps to stop the spread of COVID-19.

*(Close contact is defined as someone who was within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period* starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to test specimen collection) until the time the patient is isolated.)*

Positive Cases:
If you have been tested and confirmed positive for COVID-19, complete the COVID-19 Self-Reporting Form. The COVID Team will develop a plan for students to resume classes on campus.

Symptomatic Cases:
If you develop symptoms of COVID-19, stay home and contact your instructor and complete the COVID-19 Self Reporting Form. The COVID Team will contact students to collect additional information and provide guidance to students.
Exposure Cases:

If you have been exposed or informed of possible exposure, complete the COVID-19 Self Reporting Form. The COVID Team will assess your risk level for exposure and develop a plan for you to resume classes on campus.

<table>
<thead>
<tr>
<th><em>Level of Exposure</em></th>
<th>ask these questions to determine risk level of exposure</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>No to all the questions</td>
</tr>
<tr>
<td></td>
<td>1. Were you wearing face covering when around the person who exposed you?</td>
</tr>
<tr>
<td>Medium</td>
<td>Yes/no combo</td>
</tr>
<tr>
<td></td>
<td>2. Were you maintaining 6' distance?</td>
</tr>
<tr>
<td>Low</td>
<td>Yes to all the questions</td>
</tr>
<tr>
<td></td>
<td>3. Were you with them 15 minutes or less?</td>
</tr>
</tbody>
</table>

Faculty Support

The Dean of Student Services office will complete an assessment of a student once the COVID-19 Self Reporting Form is received. A course of action will be determined once the assessment is complete. Faculty will receive an email from the Dean of Student Services office when a student is required to self-quarantine. A follow-up email will be sent from the Dean of Student Services COVID Team once a student is clear to resume classes on campus.

VI. How to Resume Classes on Campus

Our “return to work” practice for someone testing positive for COVID-19 is that

- Students are required to self-quarantine for 14-days beginning with the onset of symptoms
- Be symptom free for 3 consecutive days

If you have been exposed with medium to high risk, then you may return after a 14-day self-quarantine period and be symptom free for consecutive days.

VII. COVID-19 Testing Site

Victoria College is partnering with Your Health Lab, in providing COVID-19 Testing. As a reminder there are no cost to VC students and employees. No physician referrals or appointments are required.
• For a VC student, they will need their Victoria College student ID (V#) and a photo ID.
• VC employees, you will need your Victoria College access badge.
• If you have health insurance of any kind, please be sure to bring your insurance card. No copay or out-of-pocket expenses will be charged.
• Free COVID-19 testing will be offered even if you do not have health insurance.
• The molecular tests will be conducted using a nasal swab to determine if patients have an active coronavirus infection. Molecular testing is more accurate than rapid testing, but results are still available within 24 to 72 hours.

Your Health Lab is located at Citizens Building C (2710 Hospital Drive, Suite 106). Be sure to call ahead to (361) 649-8770 or (361) 541-5098 for expedited service. COVID-19 testing is offered Monday-Friday, 7 a.m.-5 p.m. and Saturday 8 a.m.-noon.

Vaccinations

Below is the link for the CDC guidance on vaccines.

People are considered fully vaccinated:

• 2 weeks after their second dose in a 2-dose series, like the Pfizer or Moderna vaccines, or
• 2 weeks after a single-dose vaccine, like Johnson & Johnson’s Janssen vaccine

If it has been less than 2 weeks since your shot, or if you still need to get your second dose, you are NOT fully protected. Keep taking all prevention steps until you are fully vaccinated.

If you’ve been fully vaccinated:

• You can gather indoors with fully vaccinated people without wearing a mask.
• You can gather indoors with unvaccinated people from one other household (for example, visiting with relatives who all live together) without masks, unless any of those people or anyone they live with has an increased risk for severe illness from COVID-19.
• If you’ve been around someone who has COVID-19, you do not need to stay away from others or get tested unless you have symptoms.

VC employees who are fully vaccinated that have been exposed to COVID, and can provide official documentation of a vaccination, and are asymptomatic, may be allowed to return to work and/or classes immediately without COVID testing.
