Objectives:

- Identify an adequate and ethical stopping point in the plan of care for COVID-19 patients.
- Differentiate the safety and efficacy of using prone positioning in the reduction of mortality in COVID-19 patients.
- Determine ways to enhance patient care through advanced degrees.
- Employ mental and emotional coping strategies to elevate performance and patient care.
- Use proper communication techniques in a healthcare setting.
- Analyze stressors in our everyday lives and apply coping techniques to alleviate them.

Brochure is a project created and designed by SCOPE students
